

MaliStock is a multi-purpose inventory solution designed to provide businesses an efficient and affordable inventory system. Minimize inventory errors and increase control with accurate physical counts.

MaliStock software solution is easy-to-use and implement without the cost or complexity of larger advanced inventory systems.

PRODUCT BENEFITS

- Quantify ROI :Prevent loss of assets –Perform faster and accurate inventory audit
- Immediately visualize and track unlimited number of inventory/assets
- Increase staff response time
- Access your information from any location without the hassle of configuration
- Point and scan to conduct inventory, move asset or obtain detailed information
- Visualize and identify patterns through report generation

PRODUCT KEY FEATURES

- **Support Complex Types of Items properties** – multiple items properties could be manipulated in the same session; Quantity, Serial Number, and Lot Number (Expiry Dates).
- **Highly Configurable, Simple, and Friendly Interface** – The ease of navigation and consistent look-and-feel makes the most complex operations simple and quick to use. The user can turn off or on system parameters to customize MaliStock according to the business requirement leveraging the client for the cost of S/W customization.
- **Unlimited Levels of Location Hierarchy**- Whether warehouses are divided into sub locations or not, MaliStock database and application are configurable to cope with any warehouse structures.
- **Flexible Inventory Physical Count**-Perform inventory count during business operation. Roll back to any zone to correct errors performed during an inventory.
